

Joe's Daily Hit List Of Absolutely Free Traffic Resources Anyone Can Use To Increase The Flow Of New Visitors To Their Website, Affiliate Link Or Home Business.

Feel Free To Pass This Around To Your Teams, Downlines And Sponsors.

These resources are partially responsible for adding over 50 people in less than three weeks to my main program. I say partially because I use many different resources including paid resources in all my promotions online and off.

The reason I use the free resources below are simply because they are free and they really do produce results.

Most people want to charge you for their time in testing, using, collecting and producing a quick list of what works but you get my guide for free.

So no matter what you are promoting, you need to get started somewhere and this list is an excellent way each day to focus your attention to the job of getting visitors to your sites. So dig right in and let's get started!

Joe Sansoucie

Before we start, If you don't have a really good program to promote already I am comfortable recommending the ones on this short list.

1. <http://www.traffic-edge.com/workathome.html>
2. <http://www.traffic-edge.com/bigdiscounts.html>

I did say it was short didn't I?

Well there you have it. As you can see it won't take all your time to take advantage of the free resources to increase your web traffic everyday. Like I mentioned, if you use them daily you will see results.

This next section is for those who wish to ramp up their marketing efforts and aren't afraid to spend a few dollars to gain an advantage in the marketplace. I paid for these and highly recommend them because of the results I get. Of course I cannot guaranty that your results will be like mine. In fact they could be a lot better than I received. Results are always based on many variables and your choice of niche or lack of. I wish you all the best in your marketing efforts on line and off.

I was skeptical at first like many who joined before me, but once I did join I was a believer. Within a few days I started getting new sign ups to my main program. Ever since then it has not stopped at all. New sign ups to any of your programs is a reality by clicking this link.

<http://www.traffic-edge.com/spinsuccess.html>

The cost is minimal and the extra \$200.00 a month in free pay per click funds is a nice bonus. They replenish your account every month. This gives you industrial strength advertising that will separate you from other affiliates who do not take advantage of this service.

On the topic of separating yourself from the other affiliates who may be marketing the same thing you are is to get a domain name for the program and redirect it to your affiliate link. It looks more professional and is easier to put into your ads.

If you need a good service to register your new domain use this link to get a good domain registration service.

<http://www.traffic-edge.com/domainregistration.html>

While you're there why not register another domain for your email and Blog duties. You will need web hosting and for that service I have and still use this service. Dealing with an individual versus a support system is much easier when you have questions about your web hosting account.. <http://www.ultimate-host.net>

Thanks again for downloading my free hit sheet for getting more traffic to your website. Feel free to pass it along.
